ICT Specialist Day - Awakening Possibilities

Friday, May 26, 2017
8:45 am - 3:30 pm
Cloverdale Christian School
5950 179 St., Surrey BC

(refreshments and lunch provided)

Register here

The Ministry of Education in BC has placed a renewed focus on the development of code and computational thinking training for students across all areas of the curriculum. What does this look like, and how are teachers to engage and unlock student's abilities to think computationally?

ICT: Awakening Possibilities is a day of professional development for ICT leaders, teachers, and administrators who want to know about how to carry out the coding initiatives and who want exposure and experience with entry points into the development of computational thinking.

Join us for an informational and hands-on approach to learning about coding and computational thinking.

Note: This is a repeat of the specialist day held on April 3, 2017.

8:45 am	Registration and coffee
9:30	Welcome and devotions
9:45	**Unleashing Potential through ICT Engagement**
10:15	Coffee Break
10:30	**Ministry of Education - Introduction to Coding/Computational Thinking** How do we engage teachers and students through recognition of regular activities that already highlight our engagements with coding?
12:00 pm	Lunch
1:00	**An Immersion in Maker Spaces** Team challenges through an immersive experience with Sphero's, Drones, Lego Mindstorms, Osmos, 3D and Vinyl printers, and green screening technology. Learn through challenge-based play and experience the drive behind maker spaces and computational thinking introductions.
3:00	Discussion, networking and Q/A
