

BC Children's Health Promotion & Schools Team

Alex Gist - Health Promotion Specialist, Health Promotion & Schools, BCCH

December 11, 2023

*We gratefully acknowledge that we are gathered on the
unceded, traditional, and ancestral lands of First Nations
in this place currently known as British Columbia
where we work, play and live.*

*First Nations have been responsible for stewarding
this land for all time and we give thanks
as uninvited guests on these lands.*

Provincial Health
Services Authority

BCCH Health Promotion & Health Literacy Department

Who we are:

Our team works to enhance the mental health and well-being of BC's children, youth and families through health promotion and health literacy.

What we do:

- Develop, adapt, curate, promote, and navigate resources
- Offer education, peer support, and professional development
- Build capacity across complex systems like schools, communities, and health organizations
- Grow provincial networks and partnerships

BC Children's School Mental Health Promotion Team

The BC Children's School Mental Health Promotion team supports school communities with mental health promotion planning and implementation by providing *coaching, resources and professional learning.*

Goals and Audience

Purpose: To enhance capacity for system-wide changes in school communities that improve student mental health and well-being.

Goals:

- Build on the existing capacity and reduce barriers for school communities to equitably implement mental health promotion activities
- Amplify and enhance the positive work already happening
- Support system-wide changes to improve student mental well-being

Mental Health and Well-Being in Schools Framework

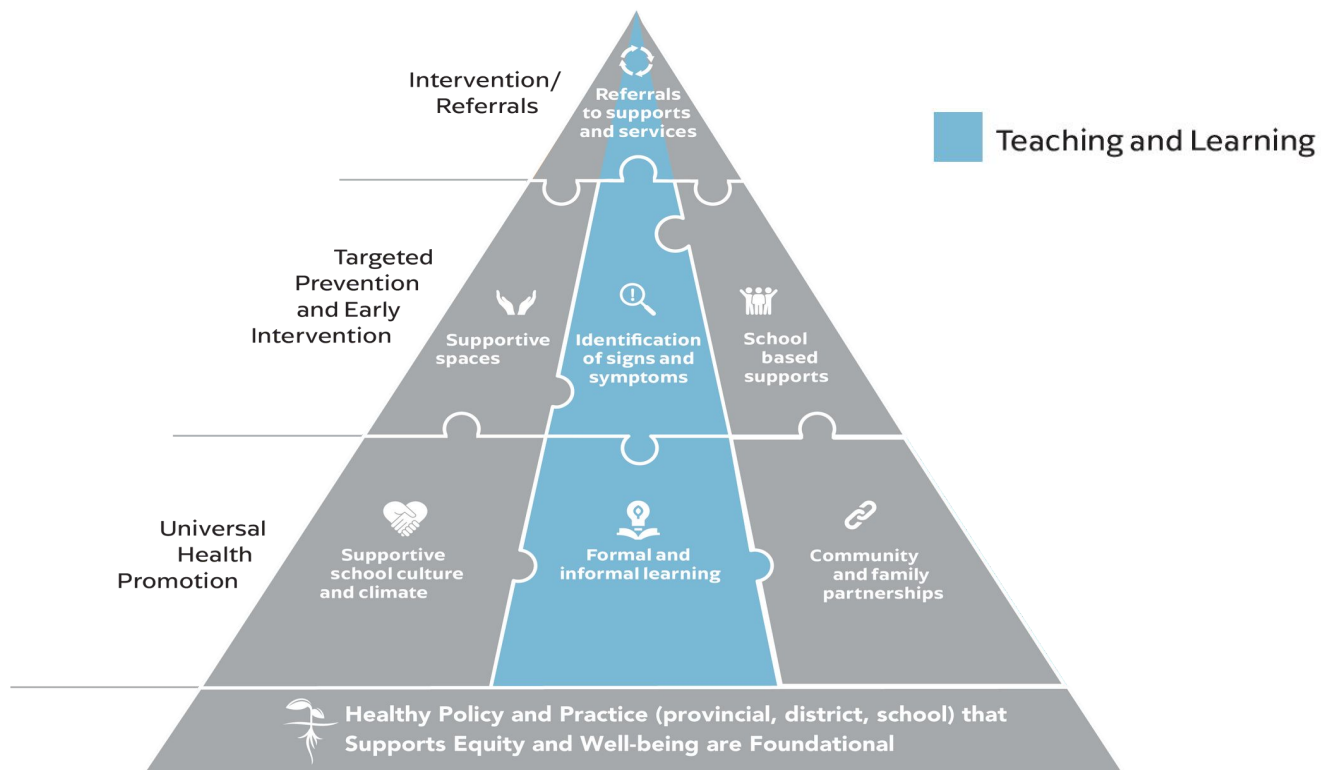

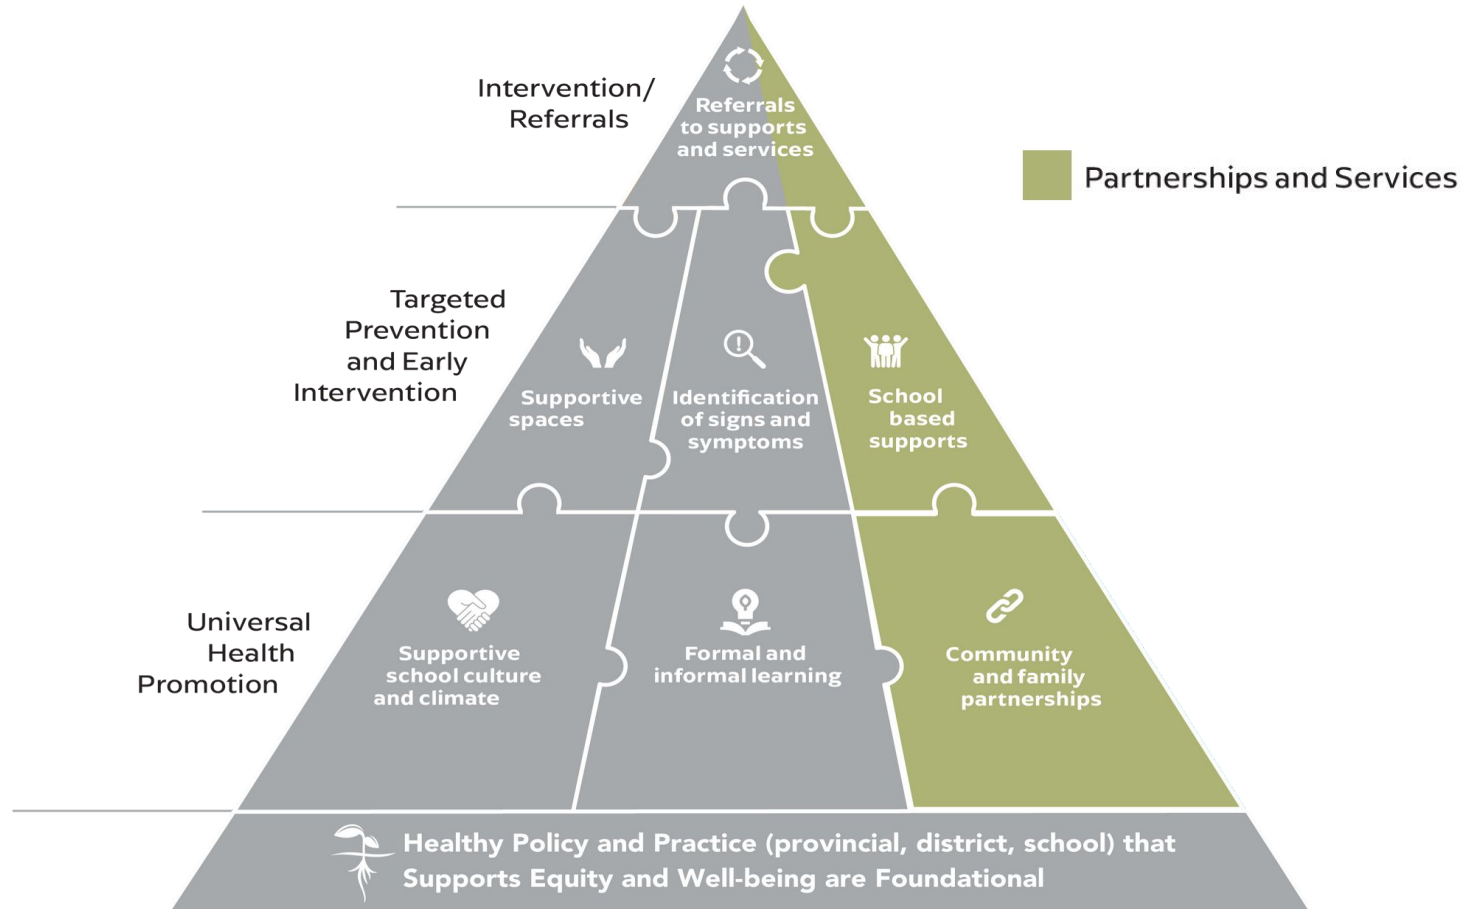

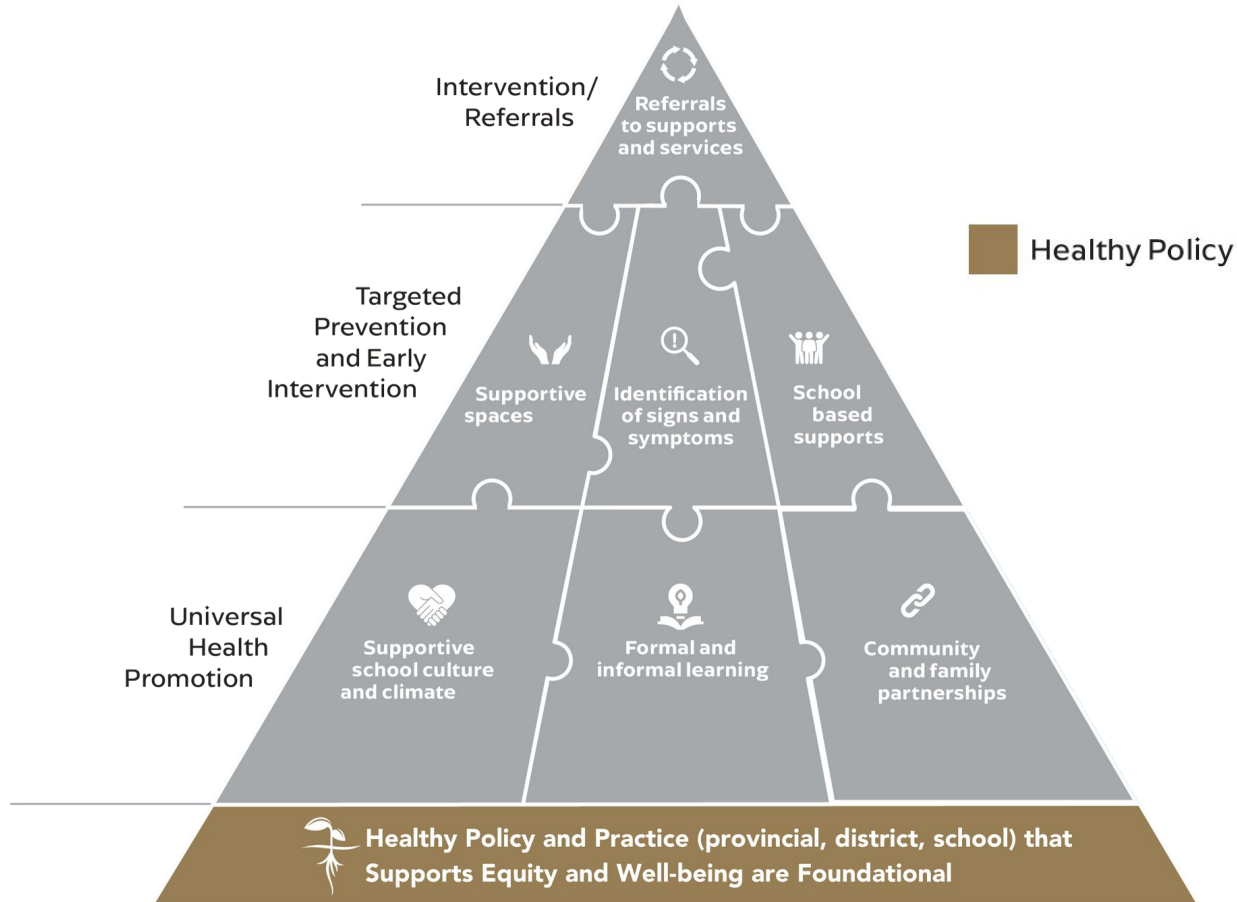

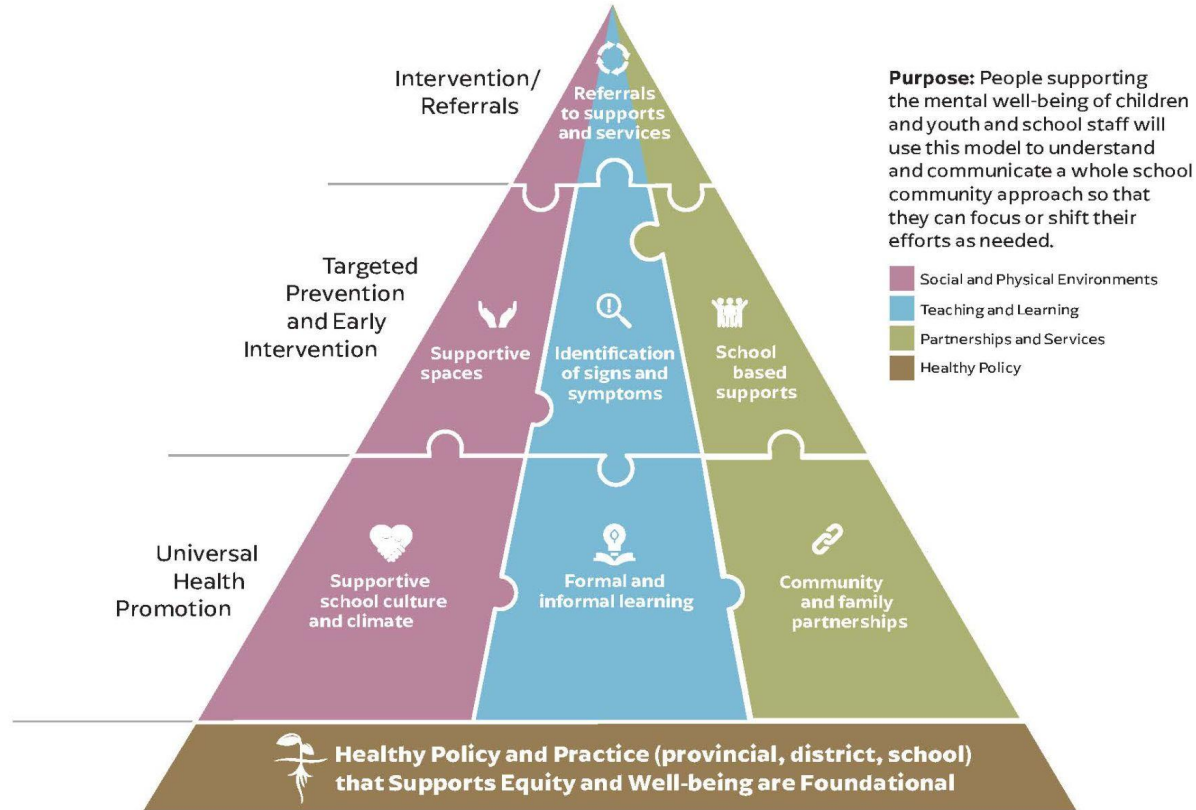

Mental Health and Well-being in Schools

How the framework has been used to date

- To situate and contextualize efforts to support mental health and well-being and to show how they fit together to support all students
- To identify different efforts and practices currently in place, while also looking at the big picture
- To map existing initiatives
- To identify gaps and areas for opportunity
- Individual school districts have used the model to develop their own mental health frameworks, plans and strategies
- To communicate with partners

Definitions for the Pyramid Framework

Background: This document was developed to provide more information on the content of the Pyramid Framework.

ASPECT OF THE PYRAMID	WHEN WE SAY:	WE MEAN:	THIS IS IMPORTANT BECAUSE:
 Foundational Elements	Compassionate Systems Leadership	"Compassionate systems leadership in education is an approach that inspires transformation and instructional best practices that lead to student success. It is anchored in self-awareness, social awareness, responsible decision-making, self management and relationship skills" (MHIS, 2020, p.7)	Compassionate systems leadership helps develop system-wide well-being by developing tools and practices for all educators to support their own well-being and, in turn, support student well-being and resiliency.
	Healthy Policy and Practice	"Policies, guidelines, and practices that promote student well-being and achievement and shape a respectful, welcoming and caring school environment for all members of the school community" (JCSH, 2015, p. 2)	Official policies and unofficial policies (guidelines) shape how we act and respond to situations. Therefore, these policies can promote or inhibit mental health and well-being.
	Universal Health Promotion Elements	School culture is the beliefs and behaviours held by school leaders and others within the school.	School culture can either reinforce or contradict health promotion messages learned within the classroom. Students learn best in environments that are trauma informed and that are physically, socially, emotionally, and culturally safe-- when they have positive relationships with the adults in the building and their peers and have had their basic needs met.

ASPECT OF THE PYRAMID	WHEN WE SAY:	WE MEAN:	THIS IS IMPORTANT BECAUSE:
 Universal Health Promotion Elements	Formal and Informal Learning	Formal learning includes explicit instruction in areas related to mental health promotion including programs, lesson plans, presentations and resources. Informal learning takes place outside of formal and explicit learning opportunities through avenues such as modelling, teachable moments and student-staff relationships.	Mental health promotion activities are most effective when they are both taught explicitly and the key messages and skills are repeated, reinforced and consistent across contexts. Therefore, mental health promotion activities are better if they extend beyond a specific time, period, class or program for SEL or MH, and become embedded in the school culture.
	Community Partnerships	Community partnerships are aligned and effective working relationships between schools/districts and community organizations or the health sector to advance mental health and well-being.	Partnering with community and health organizations provides students access to resources and services that schools do not provide. These partnerships also provide an opportunity to reinforce key mental health promotion messages across contexts.
	Family Partnerships	The supportive and welcoming partnerships between school staff and students' families.	Strong school-family partnerships support students' well-being and academic achievement. These partnerships also provide an opportunity to reinforce key mental health promotion messages across home and school settings.
 Targeted Prevention and Early Intervention	Supportive spaces	The school has supportive spaces for students who might need extra support for their mental health and well-being.	Physical spaces in the school can promote student well-being (e.g., peer support rooms, buddy benches) and emotional well-being (e.g., calm down corner) for students who need extra support for their mental health and well-being and contribute to a positive school culture.

ASPECT OF THE PYRAMID	WHEN WE SAY:	WE MEAN:	THIS IS IMPORTANT BECAUSE:
 Targeted Prevention and Early Intervention	Identification of signs and symptoms	Educators have the knowledge to identify signs and symptoms of students who might need extra support. Students have the knowledge to identify when they or a friend might need extra support.	The identification of signs and symptoms is an important first step in accessing extra supports for students if needed.
	School based supports	School based supports refers to: ► Targeted prevention and early intervention programming offered to select students or groups of students ► Counsellors, School Psychologists or other mental health professionals based in the school.	Schools can play an important role in providing targeted prevention and early intervention to students which can support student well-being and prevent worsening mental health challenges. In addition to having programs and other supports available, it is important that students and educators alike are aware of and able to access these extra supports. Mental health services that are offered in schools may reduce barriers to access and aid in system navigation.
 Intervention/Referrals	Referrals to supports and services	Students have clear and accessible pathways to and from supports and services.	When students and their families know about and feel comfortable accessing specialized mental health services provided by mental health professionals, they are more likely to access those services.

Mental Health and Well-being in Schools: Self-Reflection Tool

This self-reflection tool is a companion to the Mental Health and Well-being in Schools Framework. The Framework provides a model for a comprehensive, whole-school approach to supporting mental health and well-being. This tool provides questions to consider for each of the pieces of the Framework. This tool can be used in planning and assessments to map strengths and areas for improvement in your district or school community.

Healthy Policy and Practice (provincial, district, school) that Supports Equity and Well-being

Area	Ideas for Reflection	Strengths	Areas for Improvement
Vision and Goals	Our school/district has a vision and goals for the mental health and well-being of students and staff.		
Infrastructure for Sustainability	Our school/district has infrastructure for sustainable mental health and well-being activities.		
Staffing and Resources	Our school/district has adequate staffing and resources to support mental health and well-being vision/goals.		
Well-being Data Use	Our school/district has access to and effectively utilizes data on well-being.		

Accompanying Documents - Self-Reflection Detailed

Universal Health Promotion

 Supportive school culture and climate					
Area	Questions for Reflection	Possible Indicators	Strengths	Areas for improvement	Ideas for Action
Staff Well-being Our school/district supports the well-being of our staff.	How does your school/district support staff well-being? ► What kinds of supports, policies and practices are embedded to support the collective and relational well-being of staff (e.g., positive, supportive relationships between and among educators and administrators, positive school culture/environment, limiting email, check ins)? ► How have systemic stressors that affect staff well-being been addressed (e.g., school/district policies, attitudes toward self-care/boundary setting)? ► What kinds of support are offered to support the well-being of individuals? ► Does your district have an ongoing way to assess staff well-being? Is this information communicated and acted upon?	HR Data, Staff Well-being Surveys (e.g., Guarding Minds), Focus Groups			
Social Environments Our school(s) have a healthy culture and	► How does the school/district facilitate every child to have a supportive relationship with at least one caring adult in the building? ► How does the school/district support positive peer relationships? ► How does the school/district seek to address bullying? ► What does your school/district do to foster student and staff sense of belonging and connectedness? ► Do students and all school community members perceive school as a physically, psychologically, and culturally safe space?	MDI - Connectedness to Adults, Number of Caring Adults, School Climate and Belonging, Peer Relationships SLS - Sense of Belonging, Felt Safety, Caring adults, Bullying YDI - Victimization, Reasons for Being Bullied, Supportive Adults at School, School Caring AHS - Violence and Discrimination, School Connectedness, Safety, Supportive Adults			
Physical Environments Our school(s) have healthy and safe physical spaces and environments.	► Do all our facilities have basic amenities (e.g., sanitation, air quality)? ► What spaces do we have for outdoor learning and play? ► What physical spaces do we have that help promote connectedness? ► How do we support access to healthy foods for those who need it and promote healthy food choices?	MDI - Breakfast Measures, After-School Spaces Measures			

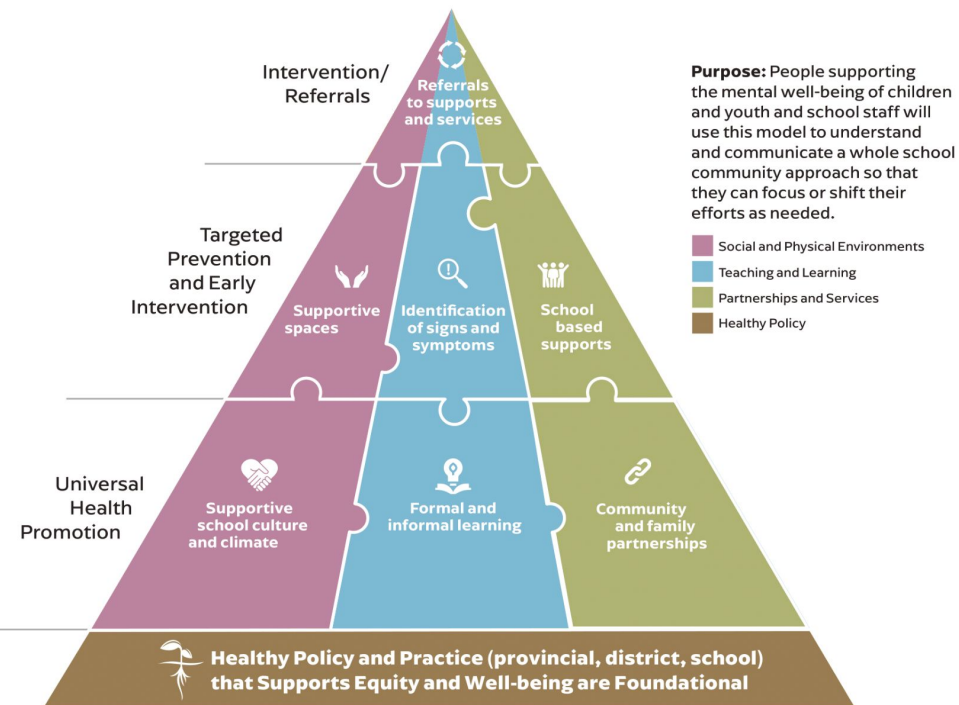

Schoolwide Assessment & Growth Plan Toolkit

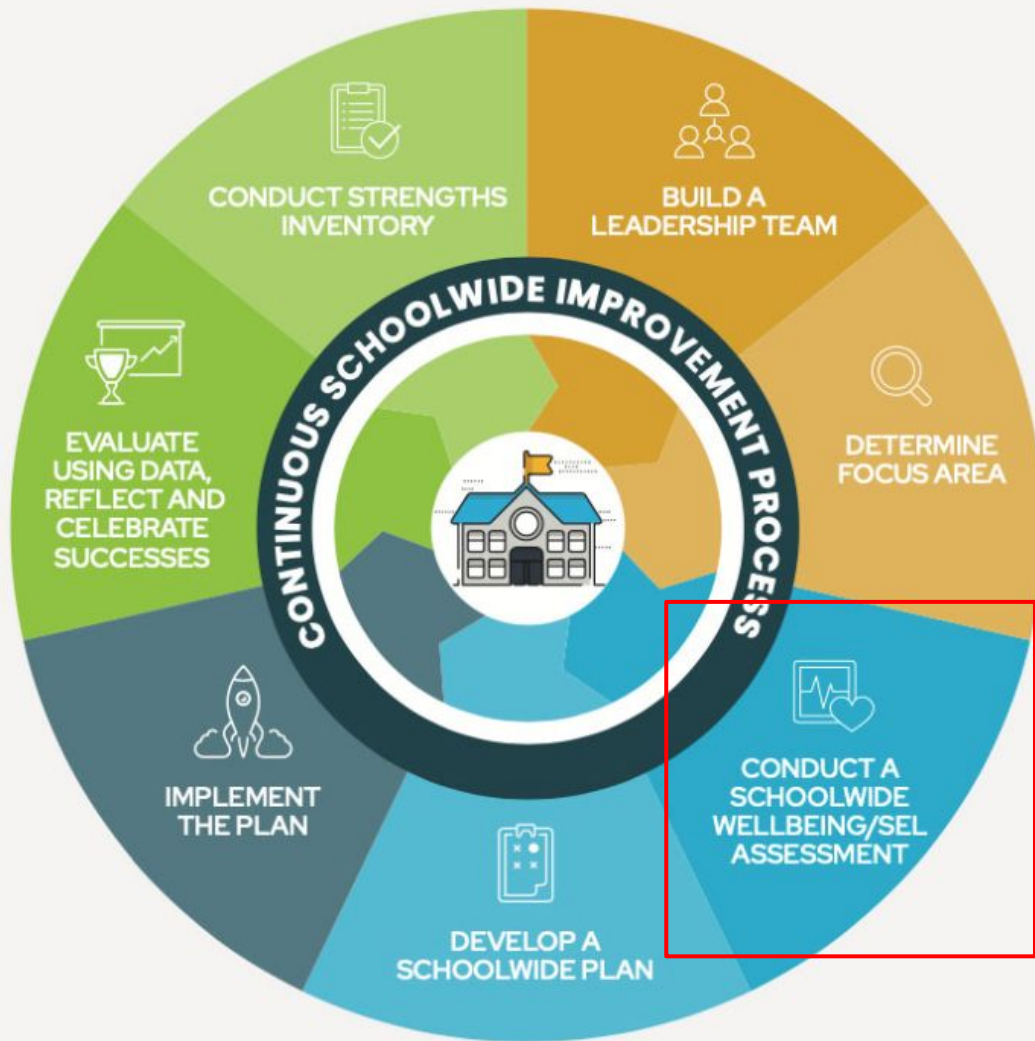

Schoolwide Assessment and Growth Plan Toolkit

The Schoolwide Assessment and Growth Plan Toolkit is one of a number of resources on the wellbeingbc.ca website. The toolkit includes a suite of tools to support school teams in assessing areas of strength and improvement around social-emotional learning and well-being along with links to useful resources to assist in growth planning. This spotlight features one of the creators of the toolkit, Jenny Williams, along with a school principal, Grace Lo-Voo, sharing their experiences both creating the toolkit as well as implementing the toolkit in a school.

Professional Learning

School Spotlights

- Short videos that highlight successful school district practices and policies that support schoolwide mental health.
- Topics include:
 - Universal Elements for Caring and Compassionate Schools (SD44)
 - Framework for Mental Health in Schools (SD45)
 - Schoolwide Assessment and Growth Plan Toolkit (FISA)
 - Schoolwide SEL (SD38)
 - Engaging Youth to Move from Data to Action with the YDI (SD34)

Kelty Where you Are Podcast

- We have produced episodes primarily for school professionals:
 - Promoting Student Well-being: The ABCs of Substance Use Education
 - When School Staff are Well, Students are Too - Strategies to Avoid Burnout
 - Social and Emotional Learning: Supporting Kids at Home and School
 - Stronger Together: Promoting Mental Wellness in Rural and Remote schools

Webinars

Our teams have hosted a number of webinars relevant to school professionals:

- Protective Factors for Student Well-being: Learnings from the Youth Development Instrument (YDI)
- Balancing our Minds Toolkit Screening
- SEL with a Cultural Lens Series
- School Anxiety & Attendance Challenges
- Selective Mutism & Reluctant Speakers

Newsletters

- We produce a quarterly newsletter for our network of school professionals to share upcoming events and resources. Our mailing list is composed of various school and district educators and health and community partners.

Youth Inspiring Action for Mental Health Video Toolkit Premiere and Panel Discussion

WEDNESDAY, FEBRUARY 15
3:30-4:30 PM

Join us for a free virtual premiere featuring the new *Balancing Our Minds* Inspiring Action Toolkit Videos showcasing the experiences of young people in BC school communities advocating for change in mental health. Check out the [toolkit here](#).

The Inspiring Action Toolkit was created alongside our Youth Advisory committee, who provided input and led action during the development process. Our hope is that this toolkit will inspire youth to take that first step towards creating change or give new ideas for their next project.

Learn more about our framework for schools

Developed over several years in close collaboration with education and health partners, the Mental Health and Well-being in Schools Framework provides a model for a comprehensive, whole-school approach to supporting mental health and well-being. It integrates the comprehensive school health model with the tiers of support pyramid. The puzzle pieces show the many different components that contribute to health and well-being in a school community and how they align, overlap and complement one another.
